STAINLESS STEEL MANIFOLDS

TECHNICAL FEATURES

■ MANUFACTURING PROCESS

It is manufactured by cold bucking.

■ WELDED JOINTS / STAINLESS STEEL PIPE

Made with TIG method without any additional material.

MATERIALS

Stainless steel AISI 304 / 316

■ SURFACE TREATMENT / FOR STAINLESS STEEL

Degreasing, pickling and electropolishing.

FLANGE STANDARDS

EN 1092-1 DIN 2579 PN 16

THREADED STANDARD

ISO 228/1 EN 10226-1 TS 61-210

For more information, please contact us.

MANIFOLDS

TECHNICAL FEATURES

■ MANUFACTURING PROCESS

It is manufactured by cold bucking.

■ WELDED JOINTS

Steel pipe

Made with MIG/MAG method by additional material.

MATERIALS

Steel pipe TS EN 10255, ASTM A53, ISO 65,

TS EN 10217-1

■ SURFACE TREATMENT

FOR STEEL PIPE

Degreasing, pickling, electrogalvanized, chrome coating, electrostatic paints.

FLANGE STANDARDS

EN 1092-1 DIN 2579 PN 16

THREADED STANDARD

ISO 228/1 EN 10226-1 TS 61-210

TECHNICAL FEATURES

■ MANUFACTURING PROCESS

They are manufactured from the desired quality materials by applying various production and welding methods in appropriate sizes.

■ MATERIALS

Stainless steel AISI 304 / 316
Steel S235JR

■ SURFACE TREATMENT FOR STAINLESS STEEL

Degreasing , pickling and electropolishing.

FOR STEEL

Degreasing, pickling, electrogalvanized, chrome coating, electrostatic paints.

For more information, please contact us.

DIFFERENT TYPES ELECTRICAL PANEL CHASSIS

TECHNICAL FEATURES

■ MANUFACTURING PROCESS

They are manufactured from the desired quality materials by applying various production and welding methods in appropriate sizes.

DIFFERENT TYPES OF REDUCERS

TECHNICAL FEATURES

■ MANUFACTURING PROCESS

They are manufactured from the desired quality materials by applying various production and welding methods in appropriate sizes.

■ MATERIALS

Stainless steel AISI 304 / 316

Steel S235JR

■ SURFACE TREATMENT

For stainless steel

Degreasing , pickling and electropolishing.

FOR STEEL

Degreasing, pickling, electrogalvanized, chrome coating, electrostatic paints.

FUEL TANKS, HEATINGS, BALANCING TANKS

BALANCING TANKS

FUEL TANKS

24 to 2000 lt.

TECHNICAL FEATURES

■ MANUFACTURING PROCESS

They are manufactured from the desired quality materials by applying various production and welding methods in appropriate sizes.

■ MATERIALS

Stainless steel AISI 304 / 316
Steel S235JR

■ SURFACE TREATMENT

For stainless steel
Degreasing , pickling and electropolishing.

FOR STEEL

Degreasing, pickling, electrogalvanized, chrome coating, electrostatic paints.

Heating

ACCESSORIES

PRODUCTION PARTNER FOR OSMOS AND REVERSE OSMOS

TECHNICAL FEATURES

■ MANUFACTURING PROCESS

It is manufactured by cold bucking.

■ WELDED JOINTS

They are manufactured by TIG welding method in accordance with the X-RAY welding method by giving additional shield gas and metal.

■ MATERIALS

Stainless steel

AISI 304 / 316

■ SURFACE TREATMENT

Degreasing, pickling and electropolishing

MONO PHASE PRESSURE SWITCH

PRODUCT FEATURES

- Used in air compressors ,water pump and boosters
- It provides the system operated in maximum and minimum pressure range
- At the maximum setpoint, the electrical contract is switched on and the motor stops
- At the minimum setpoint, the electrical contact closes and the motor starts.

Code	Unloader Valve	Pressure Range	Connection	Factory Settings	Differential	Differential	Weight
DYR-1	without	1-6 Bar	1/4 "	2,0 / 3,2 BAR	1,2 BAR	3,5 BAR	330 gr
DYR-2	without	2-11 Bar	1/4"	2,6 / 4,0 BAR	1,4 BAR	3,5 BAR	335 gr

THREE PHASE PRESSURE SWITCH

PRODUCT FEATURES

- Used in air compressors ,water pump and boosters
- It provides the system operated in maximum and minimum pressure range
- At the maximum setpoint, the electrical contract is switched on and the motor stops
- At the minimum setpoint, the electrical contact closes and the motor starts.

Code	Unloader Valve	Pressure Range	Connection	Factory Set-tings	Differential	Differential	Weight
DYR-3	without	2-8 Bar	1/4"	2,8 / 4,0 BAR	1,2 BAR	3,5 BAR	390 gr
DYR-4	without	3-11 Bar	1/4"	3,8 / 5,0 BAR	1,2 BAR	3,5 BAR	400 gr
DYR-5	without	4-16 Bar	1/4"	6,2 / 7,6 BAR	1,4 BAR	3,5 BAR	400 gr
DYR-6	with	2-8 Bar	1/2"	3,6 / 5,0 BAR	1,4 BAR	4,0 BAR	450 gr
DYR-7	with	3-11 Bar	1/2"	6,0 / 7,4 BAR	1,4 BAR	4,5 BAR	460 gr
DYR-8	with	4-16 Bar	1/2"	8,0 / 9,6 BAR	1,5 BAR	4,0 BAR	460 gr

LIQUID LEVEL FLOATER

PRODUCT FEATURES

- Cabled Liquid level oater uses uid level control which non-aggressive water and another liquid tanks.
- Suitable for use artesian well and waste water pit

MODEL	CABLE LENGHT
DYR - FD 0.6 (9mm) Cable Liquid Level Floater	60 cm
DYR - F 0.6 Liquid Level Floater	60 cm
DYR - F 1.6 Liquid Level Floater	160 cm
DYR - F 3.0 Liquid Level Floater	300 cm
DYR - F 5.0 Liquid Level Floater	500 cm
DYR - F 10.0 Liquid Level Floater	1000 cm
DYR - F 15.0 Liquid Level Floater	1500 cm
DYR - F 20.0 Liquid Level Floater	2000 cm

Product Features

- Nominal voltage : 240 V AC
- Nominal current : 10 A
- Mechanical endurance : 30.000 On-Off(Min)
- Electrical endurance : 10.000 On-Off(Min)
- Working pressure : Max 3 Bar
- Temperature limit : 80 C
- Protection class : IP 68(Max 20m depth)
- Cable material : TTR

WASTE WATER CHECKVALVES

PRODUCT FEATURES

- Threaded female x female connection
- Reux is precluded with ball closure
- Works even very low pressure
- Very low friction loss
- Working temperature -20C +80C

PRODUCT FEATURES

- Combination of checkvalve and ball valve.
- The checkvalve mechanism placed in the sphere is completely brass.
- Our product which is all brass is suitable for steam and high temperature for using.
- Provides ease of installation thanks to its recordable connection.
- The pressure gauge is visible with the manometer output located on the ball valve body.
- The full transition of the flow way is suitable to TS EN 13547.
- Thread type conforms to EN ISO 228-1.
- Design and patent belong to our company.

BALL VALVE WITH CHECKVALVE AND RAKOR

CHECKVALVE WITH RAKOR

PRODUCT FEATURES

- It is suitable for hot and cold water, air compressor and oils use
- Minimum head loss thanks to the streamlined flow design
- Full bore and high flow capacity. Silent operation
- Long-lasting with durable brass material
- It provides advantage in installation with rakor connection.

CODE	A	B	C	D (mm)	E (mm)	F (mm)

CHECKVALVE WITH FLANGED

PRODUCT FEATURES

- It is a compact product which checkvalve, nippel and flange.
- Flanged checkvalve is ideal for double pump water booster.
- It provides advantage at cost and assembly duration.
- Design and patent belong to our company.

FIVE WAY CONNECTION WITH CHECKVALVES

PRODUCT FEATURES

- It is a compact product in which five way collector and check valve are combined
- Design and patent belong to our company
- The pressure loss is reduced to a minimum thanks to the streamlined design
- Full bore and high flow capacity
- Silent operation
- Perfect seal at high and low pressure with EPDM rubber gasket Long-lasting with durable brass material.
- Use vertical, horizontal, oblique positions
